Zoom Assistance

Prepare for Your Zoom Event

FAQ:

Signing into Zoom

Students will sign into their UNC Zoom account by entering their university account credentials (i.e., ONYEN and password). Students must use their university account to participate in the program.

If you’ve forgotten your password, visit the UNC Password Reset website for assistance.

For further assistance or help with continued login issues, contact the UNC Help Service Portal at 919.962.HELP (4357) or https://help.unc.edu/sp [1].

Family members may use their personal Zoom accounts to access the meetings; however, a family member is not required to create a Zoom account for this purpose if they prefer not to.

Joining a Zoom Meeting

To access the Zoom meetings using a computer, you have two options:

Click on the provided link and choose to continue with Zoom in a web browser or by using the Zoom application when prompted.

Visit the UNC Zoom website and click ?Join? (does not require a login). Enter the meeting ID provided to you or simply click the Zoom link provided that corresponds with your session. When prompted, select ?Continue with Zoom in a browser.? 

To access the Zoom meetings using a telephone, follow these steps:

On your phone, dial the teleconferencing phone number provided to you a few
days prior to the meeting.

When prompted, use your keypad to enter the meeting ID number.

Before your meeting, you can also join a test meeting to familiarize yourself with the Zoom platform.

Using Mic or Video Functions

In Zoom Webinar, you may not typically use a mic or video. Instead there will be a Q&A box where you can ask any questions you have.

Some events may use Zoom Meeting, which will give you the opportunity to use video and mic, but those capabilities are not required for participation.

If you do not have a microphone through your computer, you can access the Zoom meeting visually via your computer, and you can use a landline or smartphone to call into the same meeting so you can hear the audio feed. This two-pronged approach will allow you to see the visuals presented during the sessions while hearing the audio of the meeting simultaneously.

If you do not have a webcam through your computer, you will still be able to participate in Zoom meetings through the speaker and chat functions. Alternately, if you have a smartphone or tablet and are able to download the Zoom mobile app from your app store, you may participate visually that way.

Creating a Virtual Background

New Student & Family Programs realizes that not everyone is comfortable showing their homes via video while on Zoom. Displaying your room on camera is not required to participate in the orientation programs.

You can display a virtual background while using the Zoom platform. To learn how, review Zoom’s instructions for enabling a virtual background during a meeting [2].

Having trouble with virtual backgrounds? Visit the Zoom website [2] and scroll to the bottom to find potential solutions.

Need Further Zoom Assistance?

For further assistance using Zoom, we recommend visiting the Zoom Video Tutorials [3] website. This site provides video overviews of the various functions of Zoom, such as:

- Joining a meeting [4]
• Testing computer audio [5]
• Testing computer video [6]
